FRUIT TREES,

AND

SHRUBBERY,

CULTIVATED AND FOR SALE AT THE

DENMARK NURSERY,

BY R. & G. B. BRACKETT.

DENMARK, IOWA:
Printed at the Evangelist Book and Job Office, Fort Madison.
1853.

AUG 17 1920

THE DENMARK NURSERY

Is situated at DENMARK, LEE COUNTY, IOWA, eight miles North of Fort Madison, six miles East of West Point, and fifteen miles West of Burlington.

In offering our Trees for sale, we have a few words to say. In the first place, particular attention has been paid to their cultivation, in order to keep them in good shape, straight and handsome. The soil on which they are grown being good and worked deep, they are uncommonly well rooted, having a large amount of fibrous roots. We have spared no pains in obtaining the best varieties of

SUMMER, FALL AND WINTER FRUIT;

Especially those kinds that have been tested and found to do well in this and the adjoining counties. In order to prevent mistakes, we cut our scions for grafting from bearing trees, as far as practicable; and such kinds as we can not get in this way, we obtain from the most reliable sources.

Our Trees are large, thrifty and well grown, from six to eight feet high, and from three to five years old. All persons who wish to obtain Fruit Trees are invited to call and see for themselves, before purchasing elsewhere.

OSAGE ORANGE.

We have for sale a large lot of OSAGE ORANGE PLANTS, for Hedges, which we offer at the market price. The plants will be warranted sound, and in good order for setting in the hedge row. 1000 plants are sufficient for setting 80 rods of Hedge.

All persons who have any doubts about the Osage Orange standing our winters, or answering every purpose for a hedge, can satisfy themselves by calling at the Denmark Nursery, where they can see full grown hedges.

APPLES--SUMMER.

Price—Ten Dollras per Hundred.

Abbreviations.—Color—B., brown; r., red; str., striped; y., yellow p., pale; g., green; rus., russet; d., dark.
Size—S., small; L., large; M., medium.

Name.	Size	Color.	Season.	Remarks.
Early Harvest,	L.	p. y.	July.	Fine early.
Red June,	M.	r.	July, Aug.	Abundant bearers.
Sweet June,	M.	p. y.	July, Aug.	Sweet, excellent.
Sweet Bough,	L.	p. y.	Aug.	Very fine.

Trumpet Major.
Portrilacca, 4 varieties.
Verbenas, 7 varieties.
Yellow Lillies.
Pœmis, 4 varieties.
Tiger Flower.
Geraniams.
Sweet Rocket, &c., &c.

DIRECTIONS FOR PLANTING.

The time for transplanting in the Fall, is from the first of October till the ground freezes; and in the Spring, from the time the ground is sufficiently thawed out till the buds open. We think Spring planting preferable, but as the roads are much better in the Fall, it is preferable for farmers, who go a distance after their Trees, to get them then than in the Spring when the roads are muddy. Trees do well taken up in the Fall and laid down, with the roots covered, so as to protect them from frost through the Winter. They will be in fine order for setting in the Spring.

In planting, dig the holes large enough to admit the roots in a natural position, without bending them—it is better to shorten the roots than to bend them. Set the trees about two inches deeper than when growing in the Nursery row.

In Spring planting, when the ground is dry, it is a good plan to pour half a bucket of water in the hole when it is about half filled, and then fill up with dry dirt.

BILL OF PRICES.

Apple Trees,	$10 00	per 100
Do. do.	85 00	" 1000
Do. do.	45 00	" 500
